

# Six Sigma Overview

COURSE DESCRIPTION

*Six Sigma is one of the most important business initiatives in the last decade. Many organizations ranging from manufacturing to service in all sectors, have successfully deployed Six Sigma to deliver measurable cost, quality, and time improvements.*

Come and learn basic concepts of the Six Sigma DMAIC (Define, Measure, Analyze, Improve, and Control) methodology, that can be applied to most fields.

**Course Duration: 1 Day (8 hrs)**

BOTTOM LINE APPROACH

Six Sigma can be applied to every business in all sectors of the economy. This class will demonstrate the effectiveness of the methodology.

Learn how your company can benefit from the same methodology that Dell Computer, Toyota, and Dow Chemical believe in.

Motorola, the creators of Six Sigma, have implemented it throughout their organization. As a result they have documented over \$16 billion in savings. Robert Galvin former CEO, says "you can achieve remarkable results; it's just common sense".
